DEPARTMENT OF PHARMACOLOGY / HARVEY E. JORDAN MEDICAL EDUCATION BUILDING.

UNIVERSITY OF VIRGINIA SCHOOL OF MEDICINE / CHARLOTTESVILLE, VIRGINIA 22908

June 6, 1986

Dr. Sheldon Sommers
Scientific Director
Council for Tobacco Research
900 Third Avenue
New York, N.Y. 10022

Dear Dr. Sommers:

I am writing you concerning your grants program for basic research. On a recent visit to the University of Virginia, members of your scientific staff spoke with the Chairman of Pharmacology, Dr. Larner, about ongoing research in this Department. He indicated to me that you might be interested in my research. My laboratory is studying the regulation of B lymphocyte growth and differentiation, with particular emphasis on the role of T cell derived lymphokines. Since you have supported a substantial number of projects related to immunology, my research may be of interest to the Council. Therefore, I would appreciate it if you would send me information about how to apply to your program.

Thank you for your consideration.

Sincerely,

Peter Isakson, Ph.D.
Asst. Prof. of Pharmacology

PI/ec
